Industry = Internet & Online

Press Release Summary = Swiss offshore Hosting Provider Artmotion Ltd (www.artmotion.eu) announced today that Artmotion Ltd has become the first offshore hosting provider who offers unlimited 10 Mbit/s Dedicated Server Products for \$149 USD/mo

Press Release Body = According to Artmotion, it is no secret that Switzerland is becoming a main attraction for high security server applications. During the last few months the company has come across many US customers seeking for unlimited dedicated server solutions with a high secure datacenter location. The partnership with many international upstream providers allows Artmotion to deliver 10 Mbit/s Dedicated Server including unlimited traffic at extremely cost-efficient price.

As Mateo Meier, President and CEO of Artmotion Ltd, explained "An offshore dedicated server with a 10 Mbit/s port usually costs over \$350/mo. Our new partnership with many international upstream providers enables us to deliver dedicated servers with unlimited

bandwidth for under \$150 USD.” He also said “With hosted server solutions we find that every customer's requirements can be quite different, the best approach is to make the server fit its application and not the other way around. Therefore we also launched business dedicated servers which are fully customized for each client”

Artmotion Ltd allows the customers to host their IT infrastructure as well as their Website on a secure offshore location. According to the company, Switzerland has a central European location and offers many benefits such as an extremely low risk of natural disasters (hurricanes, earthquakes etc.) and a high level of privacy protection.

About Artmotion Ltd

Founded in 2000, Artmotion Ltd is a privately held offshore Internet Solutions Provider. The company provides a full range of Internet-based solutions focused on small and medium businesses. Artmotion has offices in Zug - Switzerland as well as in London - England. Its data center operations are located in a highly secure Swiss offshore location. The datacenter is multi homed and connected to 17 different peerings and providers, enabling the company to offer a 99,9% network uptime guarantee.
