

Zaber Offers New Motorized Dovetail Slide

Released on: October 17, 2007, 3:51 pm

Press Release Author: [Zaber Technologies Inc.](http://www.zaber.com)

Industry: [Industrial](#)

Press Release Summary: Zaber Technologies has added a new model to its T-LLS series of motorized dovetail slides for motion control applications. The new addition is Zaber's longest travel dovetail slide to date with a positioning range of 915mm.

Press Release Body: **Zaber Technologies Inc** (www.zaber.com) is proud to announce the release of the **T-LLS915**, a **915mm travel version of its popular T-LLS series of computer controlled motorized dovetail slides**. The new model is **Zaber's longest travel motorized dovetail slide**. The **T-LLS series**

now includes linear slides with travels from 105mm up to 915mm. **Zaber's** standard motorized dovetail slides offer 0.16 um resolution at speeds up to 6mm/s. Custom leadscrew configurations are possible achieving higher speeds at the cost of positioning resolution.

Integrated motors and controllers allow **Zaber's** motorized dovetail slides to be daisy chained with other **Zaber products** and controlled from a single USB or RS232 serial port on any computer. Demo control software for a variety of programming environments is available for free download from the **Zaber website**.
