

Check Gallery Celebrates 15 Years of Eco-Friendly Checks

Your Green Choice for Checks

Released on: April 17, 2008, 12:48 pm

Press Release Author: Sondra Stegemann

Industry: [Marketing](#)

Press Release Summary: Since the launch of Check Gallery in 1993, the company has printed eco-friendly checks. They celebrate this important fact with the recent redesign of their website.

Press Release Body: **Check Gallery** has been printing eco-friendly personal checks for 15 years. Now this environmentally-friendly company is doing more to promote their long-term green efforts. Redesigning the homepage is one step they've taken. In the process, they developed a cleaner look that is more easily navigable for consumers. The new site also allows consumers to select check

designs that benefit cause-based organizations, in a continuous effort to make the world a better place.

Check Gallery uses recycled paper and vegetable-based inks to produce their checks. Specifically, the check stock is a 24lb MICR bond composed of 20% post consumer fiber. This is the highest possible post-consumer fiber used for check printing today. The bio-degradable, vegetable-based inks are free of toxic solvents and residues.

*"We take pride in our products and are proud to say that we have been printing eco-friendly checks for 15 years," said **John Browning, President of Check Gallery.** "As consumers become more and more aware of the impact they make on the environment, they are turning to greener alternatives. We are happy to be able to meet customer needs and provide them with green products."*

About Check Gallery: **Check Gallery** is America's leading eco-friendly bank check printer. They produce personal bank checks, address labels, contact cards and checkbook covers featuring beautiful, nature-inspired designs.
