FusionStorm Joins MultiFactor Corporation's SecureAuth® Partner Program

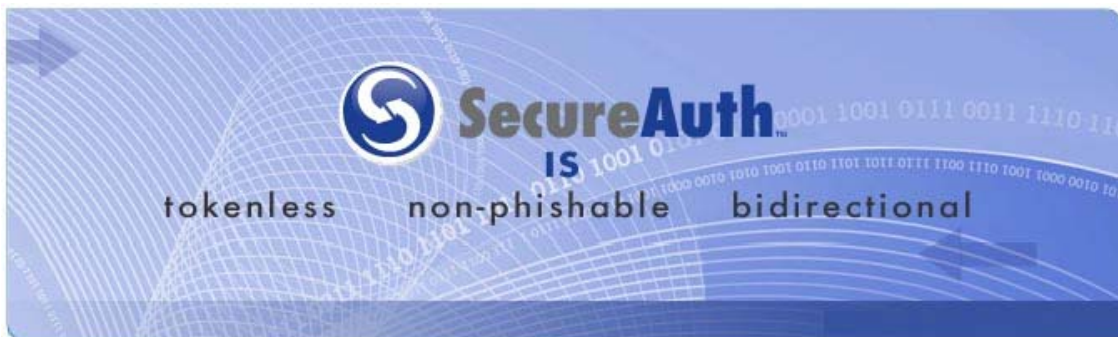

Released on: June 24, 2008, 10:33 am

Press Release Author: **Multifactor Corporation**

Industry: Software

Press Release Summary: SecureAuth® the industry's most secure identity and two factor authentication solution on the market is now available through FusionStorm

Press Release Body: IRVINE, CA—June 24, 2008—**FusionStorm**, a Microsoft Gold Certified partner and a Cisco Gold Certified and VPN/Security Specialized partner, today announced the alignment with **MultiFactor Corporation**, an innovator in two factor authentication, web application security and Cisco VPN Authentication solutions. As a **MultiFactor Corporation SecureAuth® Partner**, **FusionStorm** will now provide the tokenless, non-phishable, two-factor authentication and identity enforcement solution.

"Security is instrumental to our customers," said **Mike Chase, regional director of engineering at FusionStorm**. *"Partnering with **MultiFactor** allows us to offer the most advanced form factor for our secure web and Cisco VPN deployments."*

SecureAuth® is a tokenless, non-phishable, 2-factor authentication and identity enforcement solution. Software-based, but stronger than hardware token, **SecureAuth** makes non-phishable web application security and Cisco VPN Authentication easy to manage and cost-effective. The **SecureAuth** solutions validate both the client and server sides, utilizing an appliance or a Web plug-in and current data stores.

*"As both a Microsoft and Cisco partner, **FusionStorm** is a strategic partner for **MultiFactor** in assisting our customers to remain secure,"* said **Garret Grajek, chief operating officer of MultiFactor**

About   **FusionStorm**

About   **Multifactor**   **Corporation**
MultiFactor Corporation is pioneering the delivery of the strongest, proven 2-factor authentication, web application security, IPSec and SSL VPN security methodologies in an easy-to-deploy, low-maintenance product called **SecureAuth™.** This tokenless, browser-based authentication solution generates and validates client- and server- side certificates without PKI. **SecureAuth** represents the evolution of a technology that, for more than two decades, has remained the de facto standard for identity and access management technology. More secure than hardware or software tokens, **SecureAuth** is inexpensive to acquire, deploy and manage. **MultiFactor Corporation**'s innovation and its development of real-world security solutions draws from a diversified team of cryptographers, network and Web application specialists and certified security engineers.
