

Apps4Rent – Microsoft Gold Certified Partner – Introduces SharePoint Hosting with Windows SharePoint Services 3.0 for an Unbeatable Price

Released on: December 11, 2008, 5:15 am

Press Release Author: Gabriella Sannino, Level 343

Industry: [Internet & Online](#)

Press Release Summary: Apps4Rent LLC, a Microsoft Gold Certified Partner, and the leading provider of premium hosted solutions for small and medium sized businesses (SMBs), announced the addition of SharePoint hosting to their flexible price plans today.

Press Release Body: The affordable price plans for **SharePoint Web** site hosting with Windows **SharePoint Services 3.0** (WSS 3.0) start at \$8.95/month that includes 500MB disk space, project collaboration, document sharing, mobile access, and more. Further details of the pricing plan can be found at <http://www.apps4rent.com/sharepoint-silver.html>.

Hosted **SharePoint** on the **Apps4Rent** secure server cluster gives SMBs all the benefits of integrated virtual collaboration technology added to Web site hosting, previously affordable only to larger corporations. Hosted WSS 3.0 allows team members, clients, partners and vendors to share documents, schedules and calendars, task and contact lists, project workspaces, and a

variety of hosted SharePoint templates for business applications. The newest features of the hosted SharePoint application include collaboration for documents, blogs and wikis.

Wade Dube, an executive with Apps4Rent, shares the hosting company's excitement. *"Apps4Rent has always believed that SharePoint hosting is a great productivity enhancing platform, offering flexibility, scalability, security, and reliability. With the advanced features incorporated into hosted WSS 3.0, our business customers, ably supported by our knowledgeable team, have the opportunity to take advantage of the vast repertoire of tools available, and use them to improve business productivity."*

SharePoint WSS 3.0 hosting also gives businesses the ability to have integrated document libraries, as well as web content management with policies and workflow. An enterprise portal template, site directory, my sites and social networking with privacy control, as well as the ability to create intranets and extranets, round out the features of SharePoint hosting services nicely.

Apps4Rent gives you unlimited users on your Microsoft SharePoint hosting account, and the pricing plans include four choices for maximum flexibility. [Reseller plans](#) for SharePoint hosting services are also available. More information on pricing plans and flexibility can be found at <http://apps4rent.com/sharepoint.html>.
