Press Release Summary: Waveform Technology will freeze colocation prices during 2009 to help Michigan companies in the struggling economic climate.

Press Release Body: Troy, Michigan, 17 December, 2008 -- Troy based data center operator **Waveform Technology** today announced a price freeze for all colocation customers in its Michigan Data Center. This price freeze is intended to help IT companies in Michigan, and all over the country, who are struggling in the current economic climate.

Waveform Technology will commit to maintaining its 2008 colocation prices through 2009. Current Waveform customers will not see their rates go up, and new customers will have access to the current 2008 prices.

Steady prices will give information technology companies a better ability to plan projects. **Waveform Technology** also hopes to help boost the Michigan technology economy by providing reliable and affordable colocation to area business.

*"It's much easier for companies to budget technology resources if they're aware of the cost beforehand," said **Waveform Representative Noel Montales**. "We never want to surprise our customers by changing our rates, and we want to insure them that we won't. Waveform is committed to providing affordable colocation to Michigan businesses of all sizes, and we won't let a recession change that."*

Waveform Technology has never raised its price for 1u, customer owned colocation. Waveform had not intended to raise prices in 2009, and has made the price freeze public in order to reassure both current and potential customers.

*"We view our price freeze as an investment for the future," continued **Mr. Montales**, "anything we can do to help the companies who need our services is worthwhile."*
