Industry: [Construction](#)

Acoustical Solutions, Inc. works with the DIY Network Television Series Man Caves, to create a dream theater and quiet-rooms for the United Service Organization center at Camp Virginia. Episode will air multiple times On DIY Network between March 7 and May 23, 2009.

In its fourth project with Man Caves, Acoustical Solutions, Inc provides expert soundproofing and noise control advice and supplies EcoSorpt™ acoustical wall panels and Green Glue® sound damping compound to the United Service Organization center at Camp Virginia. The DIY Network's Man Caves television series transforms the United Service Organization center at Camp Virginia, to include a state-of-the-art movie theater and video-gaming station, as well as several quiet-rooms that troops can use to record audio and video messages to send to friends and family.

In order to create an environment for the military personnel to enjoy, Acoustical Solutions, Inc. recommended and supplied EcoSorpt™ acoustical panels, which are made of at least 85% post-industrial recycled content. The EcoSorpt™ acoustical panels were used to control noise levels in the military dream theater and quiet-rooms. National Sales Manager for Acoustical Solutions, Inc., David Ingersoll said, "The eco-friendly sound panels absorb approximately 85% of harsh noises that bounce between the walls, ceiling and floor.

Reducing the amount of excess noise from the theater increases the sound clarity, and allows the troops to really enjoy their movie."

Acoustical Solutions, Inc. also provided Green Glue® sound damping compound, which is used to block outdoor noise from passing through the interior walls, effectively soundproofing the different spaces. Green Glue® sound damping compound is an inexpensive, yet highly effective solution for soundproofing new and existing walls, floors and ceilings.

For more information about EcoSorpt™ acoustical panels or Green Glue® sound damping compound, please contact Acoustical Solutions, Inc. by calling 1-800-782-5742 or by visiting [www.AcousticalSolutions.com](http://www.AcousticalSolutions.com) For more information on the DIY Network, Man Caves and show times please visit: [www.diynetwork.com/mancaves](http://www.diynetwork.com/mancaves)
