

# npower Assists Companies With The CRC

Released on: March 31, 2010, 12:04 am

Author: [npower](#)

Industry: [Energy](#)

npower has launched a new service to help organisations manage compliance with the Carbon Reduction Commitment Energy Efficiency Scheme (CRC), and benefit from the incentives it offers.

CRC Assist offers a full service provision to organisations affected by the [carbon reduction commitment](#). It provides support to help businesses understand the [CRC](#); assists them with the development of an energy management strategy; and manages their participation in the scheme.

Dave Lewis, head of business energy services at npower, said: "We believe it's crucial that organisations understand the CRC and the management strategies they should implement to succeed within it. The scheme has been developed to offer significant incentives for the most successful participants and we have developed CRC Assist to ensure organisations are best placed to benefit from these."

CRC Assist offers support for businesses across the full scope of the CRC legislation and provides an understanding of the CRC. It's vital that all of the expected 5,000 full participant organisations, and the additional 15,000 participants who will need to register, understand the scheme and what is required of them. CRC Assist promises to cut through the complexities and help businesses understand their involvement in the scheme.

As part of CRC Assist, npower will help participants develop [energy management strategies](#). In the longer term, it will also assist them with managing their performance in the CRC's league table, which will detail the best and worst performers in terms of [emissions reduction](#). Through effective energy management, organisations will be able to achieve a higher position on the league table.

CRC Assist also offers businesses advice on carbon allowance purchasing, helping to make the 'cap and trade' element of the scheme easy. In addition,

npower will also support organisations with their records and submissions within the scheme.

The CRC Assist proposal from npower will be specific to the size, scope and strategic objectives of each organisation it works with and is available to all organisations affected by the CRC - whether current, former or prospective customers of npower.

- ENDS -

Notes to editors:

**About**

**npower:**

npower is one of the top energy suppliers to the UK business market, serving over 238,000 small to medium sized enterprise sites and around 17,000 industrial and commercial customers, with over 100,000 sites

npower is dedicated to helping UK businesses use energy more efficiently and therefore spend less money on their bills. npower aims to have a positive impact on the communities it serves and reduce customers' carbon footprint whilst always improving its service to customers.

For major energy users, npower offers multi-utility management consultancy to enable organisations to improve efficiencies right across the procurement/consumption chain.

npower customers include BT, Wembley Stadium plc, AstraZeneca and Sainsbury's.
