Leading colocation server hosting company provides dedicated server hosting to support business growth for both large and small companies.

Los Angeles, CA (PRESS RELEASE) April 28, 2010 Colocation America, a leading colocation server hosting company, announced today its dedicated server hosting for businesses. Colocation America offers Windows dedicated servers and Linux dedicated servers with the option for both managed and unmanaged services. Dedicated servers provide businesses control and flexibility with a strong IT foundation to support business growth.

"Downtime can mean financial trouble for businesses trying to build a strong reputation as dissatisfied customers will to turn other vendors," says Michael Trunkett, President at Colocation America. Colocation America dedicated servers can be configured to our customers™ exact needs in order to maximize resources and uptime. Combined with our expert technicians and consultants, Colocation America customers get a rock solid infrastructure that grows with their business.

Colocation America fully managed dedicated servers are ideal for companies that do not have trained and certified engineers and network administrators, or the facilities to properly power, cool, and upgrade dedicated servers. As a leading colocation hosting provider, Colocation America guarantees 99.99% uptime for all dedicated

servers and constant monitoring by specialized staff with the most rigorous training standards in the industry. Data centers are completely redundant with monitored network configuration and emergency systems.

"We make sure every piece of equipment is top of the line, and every employee has vast knowledge of dedicated server and colocation technology so your business can focus on what you do best," says Trunkett. Whatever your business goals are, Colocation America dedicated servers give you the foundation to reach that objective seamlessly, with maximum uptime, lightning fast data transmissions, and secure transactions.

For the control, availability, performance, and security of essential business data, Colocation America Windows dedicated servers or Linux dedicated servers can be fully managed or unmanaged. Colocation America dedicated servers guarantee superior performance and reliability, and can easily scale in tandem with business growth. Colocation America'™s advanced technical support and ongoing monitoring and maintenance allow businesses to grow without worrying about connectivity and online presence.

"Monitoring servers around the clock, upgrading software as necessary, and providing ample power and protection can take your attention away from the core needs of your business," says Trunkett. Colocation America takes pride in giving you a complete dedicated server hosting experience that is easily customizable for every type and size of business, and gives you all the tools and resources you need as your business expands.

Customers looking for reliable dedicated server hosting based on state-of-the-art software and hardware backed by a team of certified, experienced engineers and leading service partners, are encouraged to visit www.colocationamerica.com to learn more about Colocation America'™s dedicated server hosting, colocation hosting, and managed server hosting.

About Colocation America, Inc.
Established in 2000, Colocation America has grown to become one of the most reliable colocation hosting providers nationally. Based in Los Angeles, California, Colocation America was built from the ground up by professional engineers with a vision of delivering a fully integrated, trusted colocation server hosting service. Colocation America Corporation has earned a reputation with its attention to detail, highly

qualified technicians and commitment to the latest data center technology.

Colocation America'™s primary data centers are located in the world famous "One Wilshire" building (West Coast Hub) and 60 Hudson (East Coast Hub) in Los Angeles and in New York. Colocation America'™s data center locations provide maximum scalability and connectivity to major fiber carriers and can connect to virtually any backbone provider. Colocation America has direct access to over 240 bandwidth providers around the world and can scale Internet connectivity to meet client needs.
