Los Angeles, CA (PRESS RELEASE) May 12, 2010 – Colocation America, a leading colocation server hosting company, announced today its achievement of 100% uptime for colocation hosting and dedicated server hosting for all of 2009. Colocation America's constant uptime is a result of its rigorous standards for redundant power, premium bandwidth, hardware and software quality, and employee training and certification. Colocation America guarantees 100% uptime on all its hosting services.

"The difference between 99.99% uptime and 100% uptime could mean significant loss of revenue and diminished reputation, not to mention dissatisfied customers," says Michael Trunkett, President of Colocation America. "That's why Colocation America doesn't offer less than 100% uptime for all colocation hosting and dedicated server hosting clients."

Constant uptime and connectivity contributes to employees receiving up-to-the-minute information and maintaining high performance. With Colocation America's 100% uptime guarantee, businesses can deliver attentive and responsive customer support. Businesses no longer have to work as diligently to counter the damage that any downtime could inflict on their reputation.

"Colocation America's mission is to provide you with the IT foundation you need to perform seamlessly in every area, including super-fast data transmissions, clear VOIP and web video conferencing, and 100% uptime," says Trunkett. "The 100% uptime achieved in 2009 is exactly what our customers can rely on, so you never have to worry about delays or system failures."

To achieve 100% uptime in 2009, Colocation America's data centers combined several redundancies in each data center including multiple points of entry, constant monitoring of network configuration, failsafe routing, and the continuous attention of highly skilled network engineers. Colocation America guarantees that level of service to every client at all times.

"You need reliable colocation and dedicated server hosting not only to function well as a business, but to establish yourself as an industry leader," said Trunkett. "We scrutinize every step of the hosting process to maximize security, efficiency, and reliability so you get 100% uptime, 100% dependability, and 100% satisfaction."

Customers looking for reliable colocation hosting and 100% uptime based on state-of-the-art software and hardware, certified and experienced engineers, and leading service partners are encouraged to visit [www.colocationamerica.com](http://www.colocationamerica.com) to learn more about Colocation America's colocation, dedicated server hosting, and managed server hosting.

### **About Colocation America, Inc.**

Established in 2000, Colocation America has grown to become one of the most reliable colocation hosting providers nationally. Based in Los Angeles, California, Colocation America was built from the ground up by professional engineers with a vision of delivering a fully integrated, trusted colocation server hosting service. Colocation America Corporation has earned a reputation with its attention to detail, highly qualified technicians and commitment to the latest data center technology.

Colocation America's primary data centers are located in the world famous "One Wilshire" building (West Coast Hub) and 60 Hudson (East Coast Hub) in Los Angeles and in New York. Colocation America's data center locations provide maximum scalability and connectivity to major fiber carriers and can connect to virtually any backbone provider. Colocation America has direct access to over 240 bandwidth providers around the world and can scale Internet connectivity to meet client needs.
